bkc current architecture diagram

tips =====

x0. map symbol

Stand for the modules that already exist

Stand for the modules that will be newly added or modified turbulently

x1. relative links

The detailed information of each modules above, such as functionalites, was separated to another doc As '[bkc top level dir]/auxiliary/trunk/bkc_trunkdoc_designment_aux.pdf_' for the two points:

a0. Clear and easy to read for this doc.

a1. We can open the bkc_trunkdoc_designment_aux.pdf in another window, and it could be referenced easily when we read this doc.

logs =====

x0. version naming habits

Sample: v1.1.2-v0.0.1

The part before '-' is the major version which is determined by the version of current bkc.

The part after '-' is the minor version which displays the modifying frequency of this doc under the major version.

x1. current version

v1.1.2-v0.0.1
